

Guideline

how to use elements

Logo

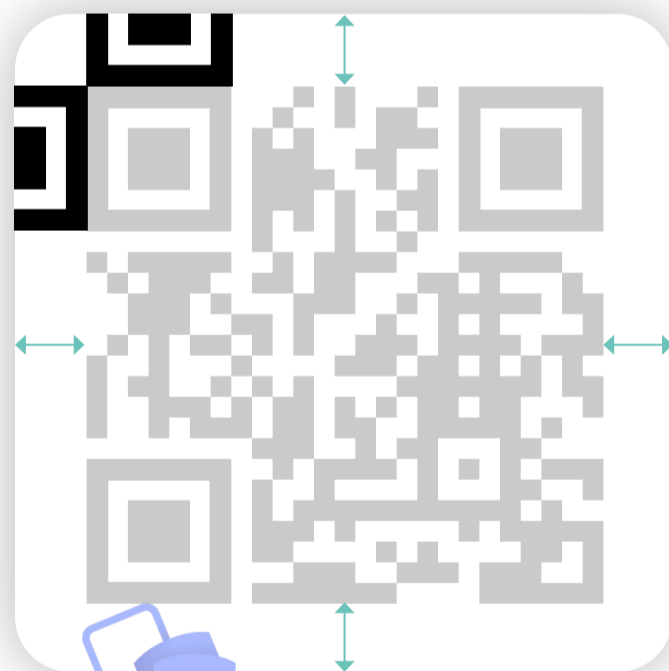

Use the size of the logo shape to measure the minimal distance between the logo constellation and any other objects.

QR code

Use half the size of the big squares in the QR code to define the space between the QR code and elements next to it.

Half the size of the big squares in the QR code

Logo combined with QR code

MobilePay logo should always appear near the QR code. Use the size of the logo shape to measure the distance.
